

eEnergy Training for Building Operations

Course Introduction

Introduction

- Welcome
- Success Stories
- Topic Introduction
- How to Approach this Course
- Icons and Use
- Developers

Energy Mgt. Overview

Introduction

- Objectives

Benefits

- Energy Management Defined
- Managing Energy Costs
- Organizational Perspective
- Reasons for Energy Mgt.
- Everyone Benefits
- Key Dimensions
- Why Energy Management?
- Importance for the Operator

Process and Players

- The Eight Key Players
- Stakeholders' Needs
- Energy Case Study
- The Operator's Role

Savings Opportunities

- Identify Savings
- Case Study Activity

Recap

- Recap

Chapter Quiz

- Chapter Quiz

Behavioural Opportunities

Introduction

- Objectives

Awareness

- Awareness Building
- Where Savings Come From

Proactive Actions

- Computer Shut Down
- Saving Energy in Your Office
- Kitchen Equipment
- Turn Off Unnecessary Lights
- Tips for Renovations
- Building Contractor Action

Communication

- Communication Strategies
- Building Awareness
- Plug in Power Meter
- Case Study

- Marketing Your Program
- Case Study
- How Aware is Your Facility?
- Motivating Change
 - Motivating People
 - Energy Awareness Quiz
- Recap
 - Recap
- Chapter Quiz
 - Chapter Quiz

Energy Basics

- Introduction
 - Objectives
- Electrical Energy
 - Basic Electricity Terms
 - DC Circuits
 - AC Circuits
 - Power and Energy
 - Activity - Run the Numbers
 - Using Power Calculations
 - Demand and PF Charges
 - Voltage and Current in Phase
 - Current lagging
 - Power Factor Examples
 - How Can I Correct PF?
 - Efficiency Defined
 - Efficiency Examples
 - Power and Energy Efficiency
 - Fluid or Air Power
 - Activity - Electrical Problems
- Thermal Energy
 - Thermal Energy Units
 - Refrigeration Basics
 - Heat Transfer Fundamentals
 - Conduction
 - Convection
 - Thermal Radiation
 - Specific Heat
 - Sensible and Latent Heat
 - Observations
 - Properties of Steam
 - Psychrometry
 - Reading Psychrometric Chart
 - Thermal Energy Problems
- Recap
 - Recap
- Chapter Quiz
 - Chapter Quiz

Metering and Billing

- Introduction
 - Objectives

Metering and Billing

- Electrical Metering
- The Electricity Meter
- Reading Demand
- Meter Response
- Reading the Meter
- Activity
- Demand Meter Sees...
- Metering Fuels
- Understand Electrical Costs
- Understanding Fuel Costs
- Sub-Metering
- Real-Time Energy Monitoring

Data Analysis

- Energy Performance
- Impact of Climate (Weather)
- Collecting Weather Data
- Tracking Consumption
- Using Historical Billing Data
- Graphical Analysis
- Comparing Analysis

Benchmarking

- Benchmarking Defined
- Types of Comparisons
- Energy Action Cycle
- Best Practices
- Case Study
- Dealing With Differences
- Total Intensity

Measurement

- Taking Measurements
- Types of Measurement
- Hand-held Wattmeter
- Portable Wattmeter
- Power Metering Video
- Digital Power Meter
- Data Loggers
- Identify Safety Issues

Recap

- Recap

Chapter Quiz

- Chapter Quiz

Lighting Systems

Introduction

- Objectives

Technical Basics

- Light Defined
- Lighting Systems
- Light Sources
- Light Sources - Efficacy
- Light Sources - Fluorescents
- Compact Fluorescent

- High Intensity Discharge (HID)
- Light Sources - Incandescent
- Halogen Lamps
- Light Emitting Diode (LED)
- Ballasts and Transformers
- Lighting Quality
- Illumination Levels
- Lighting Quality - Uniformity
- Absence of Glare
- Correlated Colour Temp.
- Colour Rendering Index
- Measuring & Metering
 - Light Level Measurement
 - Light Level Readings
- O & M Best Practices
 - Energy Savings Opportunities
 - Questions to Consider
 - Turn it Off!
 - Delamping
 - Cleaning
 - Maintenance Practices
- Upgrade Opportunities
 - Lighting Opportunities
 - Lighting Controls
 - Manual Controls
 - Automatic Controls
 - Occupancy Sensors
 - Ultrasonic Sensors (US)
 - Passive Infrared Sensors
 - Dual-Technology Sensors
 - Daylight Controls
 - Preferred Strategy
 - Preset Controls
 - Time Controls
 - Centralized Control Mgt.
 - Lighting Worksheet
 - Lamp and Ballast Retrofits
 - Fluorescent Lamps
 - Compact Fluorescent
 - Light Sources - HID Retrofits
 - Light Sources - LED Retrofits
 - LED Example - Vancity
 - Induction Lighting
 - Opportunities Summary
- Recap
 - Recap
- Chapter Quiz
 - Chapter Quiz

Electrical Systems

- Introduction
 - Objectives
- Electrical Demand

- Demand Reduction
- Manual Demand Readings
- Hourly Demand Profile
- Getting More Results
- Analyzing the Profile
- Obtaining a Demand Profile
- Portable Power Meter
- Permanent Demand Metering
- Savings Opportunities
- Daily Profiling in Action
- Activity Demand Profiling
- Motor Opportunities
 - Motors and Loads
 - Motor Selection
 - Motor Operating Conditions
 - Match the Motor to the Load
 - Motor Efficiency Compared
 - Motor Rewinding
 - Changing Motors
 - Motor Strategy
 - Activity
- Power Factor Correction
 - Power Factor Defined
 - Adding Capacitance
 - Activity - PF and Demand
- Transformers
 - Transformers
 - Transformers-Opportunities
- Voltage Optimization
 - Voltage Optimization Defined
 - Preferred Voltage Levels
 - Your Building's Voltage
 - Voltage Drop In a Building
 - Measuring Fluctuation
 - Implementation Options
 - Effects on Lighting
 - Effects on Motors
 - Name Plate Voltage
 - Decreasing Imbalance
 - Effect on Plug Loads
 - Other Benefits
- Recap
 - Recap
- Chapter Quiz
 - Chapter Quiz

HVAC Systems

- Introduction
 - Objectives
- Technical Basics
 - HVAC Defined
 - HVAC Systems and Comfort
 - Energy Flow Diagram

- HVAC System Components
- Constant-Volume System
- Constant-Volume - Example
- Variable-Air-Volume (VAV)
- VAV System - Example
- Variable Frequency Drives
- VFD Power Consumption
- Fan Coil System
- Heat Pump System
- Heat Pump Schematic
- HVAC Controls
- Measuring & Metering
 - Assessment Instruments
- O&M Best Practices
 - Practices to Save Energy
 - Pipe Heat Loss and Gain
 - Heat Loss Gain Exercise
 - Outside Air Damper Leakage
 - Upgrade Opportunities
- Upgrade Opportunities
 - Fans
 - Power Calculations
 - Fan Capacity Control Method
 - Fan Comparison
 - Fan Assessment Questions
 - Fan Assessment- Example
 - Pumps
 - Pump Assessment-Example
 - Excessive Throttling-Example
 - Pump Impeller Trimming
 - Fan and Pump Summary
 - HVAC System
 - HVAC Economizer Savings
- Recap
 - Recap
- Chapter Quiz
 - Chapter Quiz

Heating Systems

- Introduction
 - Objectives
- Technical Basics
 - Heat in a Building
 - Boiler Plant Components
 - Boiler Plant System Efficiency
 - Cycling
 - Fuel Combustion
 - Boiler Types
 - Fuel Used in Heating Plants
- Measuring & Metering
 - Combustion Analysis
 - Combustion Measurement
 - Measuring Efficiency

- Thermography
- O&M Best Practices
 - Efficiency and Safety
 - Effect of Scale
 - Heating and DHW
 - Heating Plant Maintenance
 - Savings Example
 - Efficiency for Natural Gas
 - Upgrade Opportunities
- Upgrade Opportunities
 - Improve Combustion Control
 - Relocating Air Intake
 - Smaller Boilers Turbulators
 - Stack Dampers
 - Boiler Isolation Valves
 - Optimizing Multiple Units
 - Right Size Boilers
 - Replacing Boilers
 - Installing H.E. Boilers
 - Energy Information
 - Technical Considerations
 - Features to Look For
 - Insulation
 - Domestic Hot Water
 - Heat Recovery
 - Heat Recovery-Boiler Stacks
 - Heat Recovery-Steam
 - Heat Recovery- Other
- Recap
 - Recap
- Chapter Quiz
 - Chapter Quiz

Cooling Systems

- Introduction
 - Objectives
- Technical Basics
 - The Refrigeration Cycle
 - Cooling Systems in Buildings
 - The Compressor
 - Chiller Components
 - Chilled-Water System
 - Compressor Types
 - Condenser Types
 - Cooling Efficiency
 - Chiller Comparison
 - Equipment Rating Standards
 - Part-Load Efficiency Rating
 - Standard Rating Conditions
 - Flow Rate & Temperature
 - Chiller Evaporator Flow
 - Reducing Flow Rates
 - Low-Flow Systems

- Variable-Primary-Flow
- Critical VPF Requirements
- Condenser-Water
- O & M Best Practices
 - Measurements and Metering
 - Meeting the Need
 - Cleaning and Maintenance
 - Chiller Controls
 - System Optimization
 - Chilled Water Reset
 - Server Rooms
 - Operational Indicator Activity
 - Upgrade Opportunities
- Upgrade Opportunities
 - Efficiency Improvement
 - Cooling Plant Exercise
 - Fan Speed Control
 - Airside Economizer
 - Free Cooling
 - Strainer Cycle
 - Heat Exchanger
 - Refrigerant Migration
 - Deep Lake Water Cooling
 - Chiller Retrofit Case Study
- Recap
 - Recap
- Chapter Quiz
 - Chapter Quiz

Building Controls

- Introduction
 - Objectives
 - Why Controls Optimization?
- Technical Basics
 - Building Controls
 - HVAC Control
 - How Controls Affect HVAC
 - The Control Loop
 - Control Components
 - Direct Digital Control
 - Control Methods
 - Two Position Control
 - Floating Control
 - Proportional Control
 - Proportional Plus Integral
 - Control Loop Limitations
 - DCC - Bad Control
 - DCC - Poor Control
 - DCC - Good Control
 - Activity - DDC Control System
- Savings Opportunities
 - Energy Saving Opportunities
 - Operating Schedules

- Temperature and Humidity
- Deadband
- Outdoor Ventilation
- Operating Parameters
- Pressure Control Strategies
- Fan Systems
- Optimized Static-Pressure
- Hydronic Systems
- Unoccupied Operation
- Optimum Start
- Operation/Maintenance Issue
- Activity - Optimizing Controls
- Sensor Readings
- Manual Overrides
- Trend & Historical Logs
- Trend/Historical Log Sample
- Trend/Historical Log Example
- Alarms
- Expanding DDC Control
- Recap
 - Recap
- Chapter Quiz
 - Chapter Quiz

Selling the Project

- Introduction
 - Objectives
- Business Case
 - Possible Target Audiences
 - Investment Appraisal
 - Making the Business Case
 - Need for a Business Case
 - How to Make Business Case
 - Writing an Energy Proposal
 - Assessing Costs&Benefits
 - Investment Criteria
 - Simple Payback
 - Cash Flow Analysis
 - Activity - Estimating IRR
 - Risk and Sensitivity Analysis
 - Activity-Sensitivity Analysis
 - Activity - Selling Projects
- Incentive Programs
 - Incentive Programs
 - Greenhouse Gas Emissions
 - Reduce GHG Emissions
 - Activity - Apply Incentives
- Recap
 - Recap

Final Exam

- Take the Final Exam
